iiQ Assets

Get the Device Data You Need to Defend Your IT Budget

With a Complete, Audit-Ready View of Every Device

EOY collection is when your IT budget gets decided. If your data is incomplete or scattered, you're left guessing on refresh needs, overbuying devices, and struggling to defend decisions.

Incident IQ gives you a complete, audit–ready view of every device — so you can prove what you have, justify what you need, and plan your next budget with confidence.

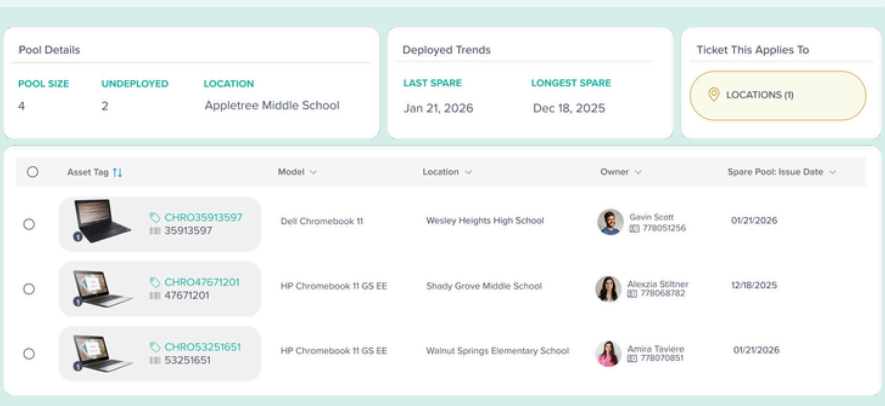

01 Device Return Rate

WHAT YOU NEED TO KNOW

How many devices were actually returned vs. issued

WHY IT MATTERS

Prevents over-purchasing and proves asset accountability during audits

HOW iiQ MAKES IT EASY

- Know exactly which devices have been returned
- See how many devices you have on hand in real time
- View status instantly by school, grade, or device type

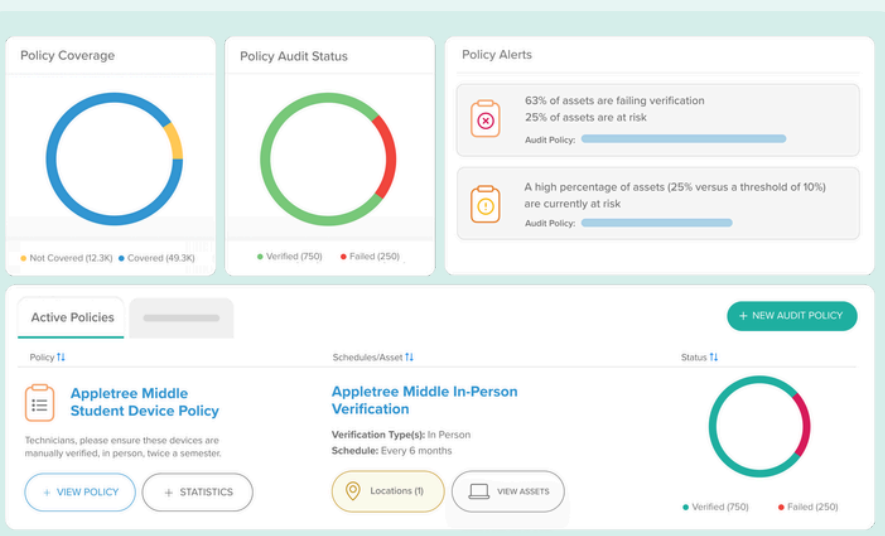

02 Unknown or Unaccounted Devices

WHAT YOU NEED TO KNOW

Which devices have no confirmed location or status

WHY IT MATTERS

Eliminates audit gaps and ensures funding requests reflect actual need

HOW iiQ MAKES IT EASY

- Get a complete, district-wide view of every device
- Automatically track devices by user and status
- Maintain audit-ready records without manual reconciliation

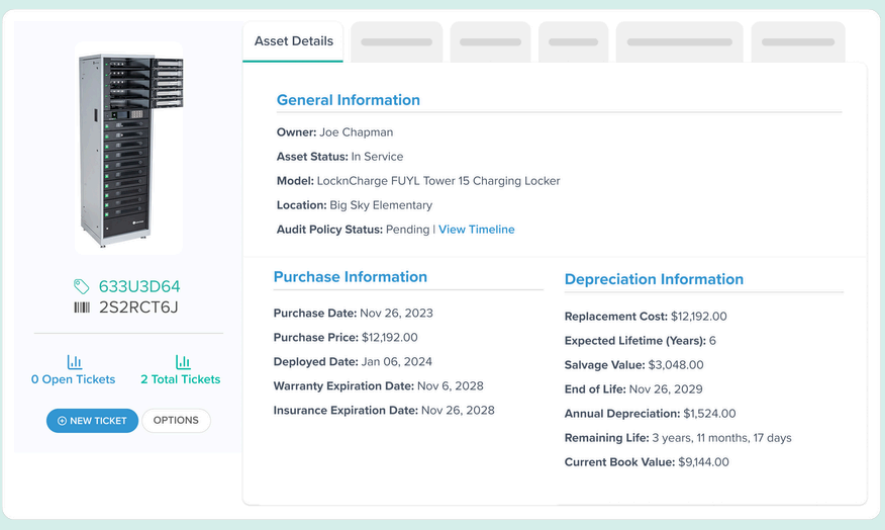

03 Damage Rate & Total Cost of Ownership

WHAT YOU NEED TO KNOW

Damage rates, repair costs, and the true cost per device

WHY IT MATTERS

Supports long-term capital planning and defensible refresh strategies

HOW iiQ MAKES IT EASY

- See full repair and ticket history for every device
- Track warranties and total cost over time
- Report on performance by model, school, or usage

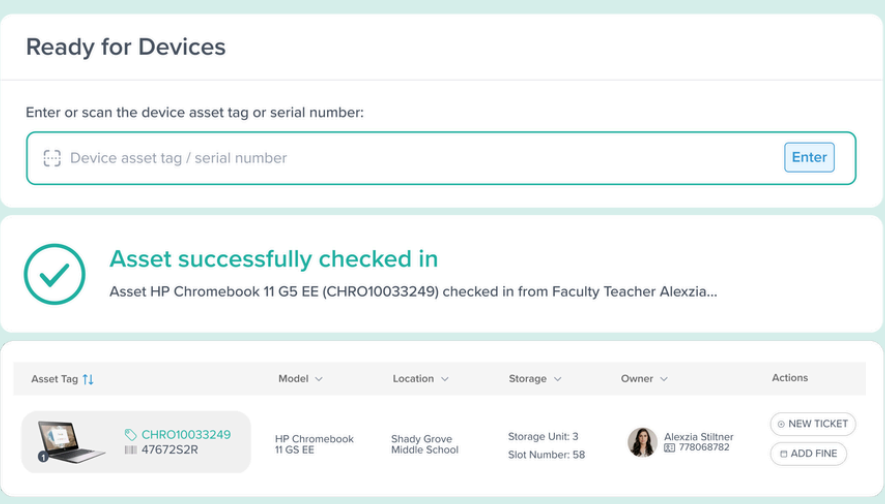

04 Collection Efficiency

WHAT YOU NEED TO KNOW

How long it takes to check in devices and reconcile records

WHY IT MATTERS

Reduces collection time and provides data to justify additional support during peak periods

HOW iiQ MAKES IT EASY

- Process large volumes of devices quickly with bulk actions
- Reduce errors and speed up reconciliation
- Manage collection from anywhere with mobile access

From Device Collection to Budget Confidence

With accurate, connected data, IT leaders can:

- Justify refresh cycles with defensible data
- Reduce unnecessary spend and avoid over-purchasing
- Prove asset accountability for audits and funding requirements
- Walk into budget and board conversations with clear, credible evidence

See how Incident IQ helps you defend your IT budget with audit-ready data
